

Lightweight mowers that pull
HEAVY-DUTY work.

Our new spur gear mowers let even smaller tractors handle big jobs.

Every farmer and rancher has different needs. So no matter the size of your tractor or how tough and uneven your terrain, each of these new, economical Farmer Series mowers will provide smooth cutting, low maintenance and the kind of reliability you demand. See which one fits your operation. To learn more, visit your dealer or masseyferguson.us.

Extremely flat, low-profile spur gear design achieves a clean cutting pattern even on difficult terrain. With its sealed common oil bath filled with lifetime oil, you won't be wasting any time checking and re-filling each individual module as you would with other disc mowers.

Model	DMI305	DMI306	DMI308	DMI309
Working width: ft. (m)	5' 5" (1.66)	6' 9" (2.06)	7' 11" (2.42)	9' 3" (2.82)
Swath width	2' 11"	4' 1"	5' 5"	6' 7"
Transport height	8' 2"	9' 4"	10' 7"	11' 10"
Cutterbar type	Spur gear	Spur gear	Spur gear	Spur gear
Disc	4	5	6	7
Blades per disc	2	2	2	2
Disc speed	3,000 rpm	3,000 rpm	3,000 rpm	3,000 rpm
Tip speed	179 mph	179 mph	179 mph	179 mph
Power requirement	30 HP	41 HP	50 HP	60 HP
Hydraulic requirement	1 SAV	1 SAV	1 SAV	1 SAV
PTO speed	540 rpm	540 rpm	540 rpm	540 rpm
Overrunning clutch	Standard	Standard	Standard	Standard
Weight: lbs.	820	897	963	1,047

Concerned about rock damage to your cutterbar? No problem. The cutterbar is equipped with a roll/shear pin for every disc that will break outside of the cutterbed, preventing any internal damage and eliminating contamination of the oil bath.

The spring loaded anti-collision break away system allows the mower to pivot backwards if the mower comes in contact with an object protruding from the ground, giving the operator time to stop the tractor before serious damage can occur.
